

**SAMPLE**

## **Good news for residents of Woodland Greens !**

Starting soon there will be a new recycling service available for you to use –  
*conveniently located where you live.*

The management of Woodland Greens is pleased to offer  
this convenient service to you all.

Please look for the tall blue carts over by any of the existing garbage containers.

These carts will be there for collecting accepted recyclable materials only.  
They will be emptied every week by a Waste Management recycle truck.

Included here is a list of acceptable recyclables for you to keep for reference.  
We encourage you to participate at any level in which you feel comfortable.

There are many materials that can go in the recycle cart – *all mixed together*.  
The more items you recycle means there is less going into the garbage container.

**Note:** *Plastic bags can be used to carry recyclables but the plastic bags themselves  
are not allowed in the recycle. Please reuse plastic bags or toss into the garbage.*

There is no cost to the management, or the residents, for having this weekly recycle  
service. In fact, if enough accepted materials are put in the recycle carts – that may  
lead to needing less garbage service, which means some cost savings for the property  
– which helps keep your rent from increasing.

Please enjoy this new service and let us know if you have any questions.
